Please provide a narrative about the event, including what happened, where and when the event occurred, and who was involved:

We had an abnormal landing with the plane bouncing off the ground a couple of times, the tail of the aircraft striking the ground, and swerving down the runway before coming to a safe stop. The B and D said they were in pain after the landing.

[REDACTED] opened our aircraft door and I informed her that we had a probable tail strike.

The first officer and captain both performed the walk around.

No one met our aircraft for the incident.
